# Job Application Clicker Game

**Our goal is to provide an entertaining user experience similar to other clicker games and entertain users.**

## I. Users Profiles

### A. Students

1. This game is perfect for students as it could work to reduce stress levels by poking fun at the current state of the job market. These users will want great quality of life features
2. This game has to be simple and loaded quickly since students don't have a lot of time in their day to get high scores. There should be an easy reward that they can achieve every time they log on.

### B. The Unemployed

1. This game is perfect for people who are unemployed as it will build confidence because they will see how easy it is to send applications to potential employers
2. It should be easy to click and track how many applications have been acquired maybe a large count

### C. Gamers

1. This game is perfect for gamers as they will be able to shoot for high scores and improve their previous scores. Gamers are the types of user who will try to break the app or reach its upper limits so the app must be functional after so many clicks
2. Some sort of mega achievement that would be small enough to look possible but large enough that it would take weeks

## II. Must Have Features

### A. Clicker

1. Button that when clicked increments counter. This value can be used to purchase upgrades.

**B. Upgrades**

1. When purchased, it increases the effectiveness of the clicker.
2. Autoclickers, automatically increases the value, separate from the clicker object.

**C. Game State Preservation**

1. Let all game data persist between logins; score, upgrades, achievements etc.

**D. Progress Display**

1. A large counter displays the number of applications available to spend.
2. Players can see their applications per click and applications per second.
3. A separate counter tracks lifetime applications earned so purchasing upgrades does not reduce achievement progress.

**E. Achievements**

1. Players unlock achievements by reaching milestones, such as earning 100 applications or purchasing their first autoclicker.
2. A long-term achievement gives players a larger goal, such as earning one million total applications.
3. A notification appears when an achievement is unlocked.

**F. Instructions**

1. A short help section explains how to click, purchase upgrades, and use autoclickers.
2. Instructions explain that applications and job-related events are part of the fictional game.

**G. Reset Progress**

1. Players can reset their saved progress to start a new game.
2. A confirmation message prevents players from accidentally deleting their progress.

For a separate **Optional Features** section, you could add daily rewards, offline application earnings, sound effects, and funny rejection or interview messages.
